Objective

Passionate Frontend Developer with 4 years of experience building responsive, user-friendly web applications using React.js, Next.js, and JavaScript. Focused on improving performance, creating seamless user experiences, and delivering high-quality solutions, with measurable impact on application speed and development efficiency.

Experience

- **CMExpertise Infotech Pvt. Ltd, Ahmedabad, India** February- 2025 - Current
  Senior Frontend Developer
  - Developed and maintained an E commerce platform using Next.js, Redux Toolkit, JavaScript, and Tailwind CSS
  - The platform includes role-based access control across Super Admin, Vendor Admin, Branch Admin, and User panels. It efficiently manages product listings, orders, and user accounts.
  - Integrated Google Analytics tracks page views, user interactions, and conversions. Focused on building a scalable, secure, and high performance system with an emphasis on user experience and real-time insights.

- **Incipient Infotech, Ahmedabad, India** August 2023 - February 2025
  Frontend Developer
  - Specialized in creating robust web applications using HTML, CSS, JavaScript, React.js, TypeScript,Bootstrap, and Tailwind CSS.
  - Built user-friendly, responsive, and high-performance web applications by leveraging moderntechnologies and frameworks. Proven track record of effective collaboration with cross-functional teamsto achieve project goals and deliver high-quality results on time.
  - Committed to continuous improvement and adherence to industry best practices, ensuring innovativesolutions that enhance user experience and engagement.
  - Dedicated to ongoing learning and staying current with industry trends, driving the pursuit of knowledge in emerging technologies and methodologies

- **Surekha Technology , Ahmedabad, India** January 2022 - March 2023
  Junior Software Engineer
  - Developed UI components with a strong focus on responsive design using CSS.
  - Leveraged fundamental design principles to create visually appealing and adaptable user interfaces.
  - Ensured seamless user experiences across various devices, demonstrating expertise in crafting flexible and dynamic layouts for optimal usability.
  - Utilized Bootstrap extensively for streamlined CSS styling capabilities, enhancing visual appeal andensuring consistency across web projects.
  - Collaborated proficiently with JavaScript and its libraries to implement interactive and functional components.

Skills

- HTML5 & CSS3
- JavaScript
- React js
- Next js
- TypeScript
- Tailwind CSS
- Redux
- Frontend Development
- REST API Integration
- Responsive Web Design
- Performance Optimization

Education

- **L J Institute of engineering and technology, Ahmedabad, Gujarat, India** 2018 - 2022
  Bachelor of Engineering
  8.46 CGPA

Projects

- **Telehealth**
  Developed a platform with role-based access for Super Admin, Clinic, Pharmacy, Doctor, and Nurse users. Built modules for patient management, appointment scheduling, pharmacy inventory, medicine sales, and staff management. Implemented responsive UI, form validations, role-based permissions, and REST API integrations using React.js, JavaScript/TypeScript, Redux, HTML, CSS, and TailwindCSS.
- **Monitorimi**
  Developed a Watch Control Admin Panel using React.js, TypeScript, and Tailwind CSS to manage and monitor smartwatch devices. Implemented features including dashboard monitoring, notification management, Find Watch functionality, remote shutdown and restart controls, and device details. Designed a responsive and user-friendly interface to simplify smartwatch administration and provide centralized device management.
- **LauncheStore**
  In this project, I developed an ecommerce platform with Super Admin, Vendor Admin, Branch Admin, and User Panels. Super Admin manages vendors and branches. Vendor Admin handles products, categories, brands, users, and reports. Branch Admin manages products, orders, and branch-specific reports. I integrated Google Analytics for tracking user behavior. The platform is built with Next.js, Redux Toolkit, TypeScript, and Tailwind
  CSS.
- **Event Management Portal**
  Managed two distinct flows: the event manager flow and the booking user flow. Implemented QR code scanning functionality to enhance user experience and streamline the booking process. This comprehensive approach ensured seamless integration and efficient management of events and bookings
- **Client Showcase Site**
  Created a client portfolio website with data fetched from a Strapi API, ensuring the UI was fully responsive for optimal viewing across all devices. Implemented modern design principles and best practices for performance optimization, resulting in a fast-loading, visually appealing portfolio. Seamless integration with Strapi facilitated easy content management, empowering the client to update the portfolio effortlessly.
